

Optimal Solutions for the Future

PUMA VT series

PUMA VT450/750/900/1100

High Performance Vertical Turning Center

PUMA VT series

PUMA VT450 / 750 / 900 / 1100

The vertical turning center is designed for long term accuracy, heavy duty cutting and to minimize floor space. Its powerful spindle drives, meehanite casting and integral box guide way provide unsurpassed rigidity.

**New standard for unsurpassed high productivity,
high speed and high precision**

Basic Mechanism

Robust Bed Construction

In order to assure heavy duty machining and optimized chip flow, the machine base body is designed and streamlined. Its small foot print help you systemizing your manufacturing plan plot in your factory.

Robust Column Construction

The wide hardened and ground box ways reduce vibration promoting better tool life and surface finishes. The box ways are turcite coated which allows for 787 ipm rapid traverse rates. The Balanced Counter Weight located inside the column, neutralizes the gravity effect on the Vertical slide. It will also conserve electricity and prevent Turret Drop while in Emergency stop or Power failure. All axis Slides are Induction Hardened and Ground HRC 55 Hardness. Long-term Accuracies are very basic requirements on Doosan Infracore products. 3 adjustable Gibs on each Axis slide are provided to maintain original accuracy.

High Performance Spindle & Turret

The spindle is supported by a double row of tapered roller bearings in the Top and Bottom of the spindle while angular thrust bearings provide tremendous radial load capability. The Cartridge Spindle is axial symmetric construction, which provides very stable accuracy all day-long even when the spindle is heated up by continuous operation.

V12 Turret is ground finish for Zero accuracy. Turret has large Three piece curvic couplings. of clamping force so high accuracy and heavy-duty cutting can be achieved. The 12 station turret holds ID or OD tools.

Chip Disposal

- Chip air blow
- Over head Coolant for chuck
- Bed wash coolant

Safety Cover

12 mm Poly carvonate
(0.4 inch)

double steel cover

Easy Operation

The swing arm on the Main Operation panel is a userfriendly feature to minimize the distance from Part to operator's Panel during setup. Narrow Vertical panel is space saving design. The handy Sub Operation Panel beside Door for each spindle has Cycle start, Feed hold, Emergency stop, Door Open/close switches.

Technical drawing of a circular mechanical component, likely a turbine or compressor disk, showing dimensions in millimeters (mm) and inches (in). The drawing includes a central hub and a series of eight blades arranged radially. Key dimensions are labeled as follows:

- Overall diameter: $\phi 1200$ (47.2)
- Hub diameter: $\phi 440$ (17.3)
- Blade root diameter: $\phi 437$ (17.2)
- Blade tip diameter: $\phi 502$ (19.8)
- Blade width at root: $\phi 921$ (36.3)
- Blade width at tip: $\phi 1100$ (43.3)
- Hub thickness: 110 (4.3)
- Hub bore diameter: $\phi 21$ (0.8)
- Hub bore length: 580 (22.8)
- Hub bore offset: 40 (1.6)
- Hub bore offset: 350 (13.8)

Technical drawing of a circular machine tool layout. The drawing shows a central circular area with a shaded gray region. Eight machine tool components are arranged in a circle around the center. Dimensions are provided in millimeters (mm) and inches (in). The dimensions are as follows:

- Overall diameter: 580 (22.8)
- Distance from center to the first component: 25 (1.0)
- Distance from center to the second component: 40 (1.6)
- Distance from center to the third component: 110 (4.3)
- Distance from center to the fourth component: 350 (13.8)
- Distance from center to the fifth component: 500 (19.7)
- Distance from center to the sixth component: 580 (22.8)
- Distance from center to the seventh component: 500 (19.7)
- Distance from center to the eighth component: 350 (13.8)
- Distance from center to the ninth component: 110 (4.3)
- Distance from center to the tenth component: 40 (1.6)
- Distance from center to the eleventh component: 25 (1.0)
- Distance from center to the twelfth component: 25 (1.0)

Component labels and dimensions:

- Ø925 (36.4)
- Ø1100 (43.3)
- Ø223 (36.3)
- Ø440 (17.3)
- Ø418 (16.5)
- Ø1200 (47.2)
- Ø485 (19.1)
- Ø418 (16.5)
- Ø440 (17.3)

{ } : Option

Standard Feature

- Coolant flushing for bed
- Coolant flushing for chuck
- Coolant supply equipment
- Full enclosure chip and coolant shield
- Hydraulic chuck & actuating cylinder
- Hand tool kit, including small hand tool for operationst
- Hydraulic power unit
- Leveling jack screw & plates
- Lubrication equipment
- Soft jaws
- Standard tooling kit (tool holders & boring sleeve & U-Drill sleeve)
- Work light

Optional Feature

- Air blast for chuck jaw cleaning
- Automatic door with safety device
- Chip bucket
- Coolant gun
- Drill socket
- Dual chucking pressure
- Hardened & ground jaws
- High pressure coolant
- Manual tool presetter (Removable type)
- Oil skimmer (Belt type)
- Proximity switch for chuck clamp detection
- Signal tower (yellow, red, green)
- Special chucks
- Straddle tool preparation (Piping & Solenoid valve, Exclude straddle tool)

- The specifications and information above-mentioned may be changed without prior notice.
